## **It's Time to Re-Think Everything**

To All of Our Dear Valued Subscribers,

Welcome to the **Political Chaos of 2023**.

And within the first two weeks of 2023 we've witnessed what could become one of the biggest political scandals in recent history.

Of course, we're referring to the volumes of classified documents found at O'Brien's Chinese funded "Think Tank" and alongside of his Corvette in his *"locked garage."*

***LMAO!***

But our naturally suspicious nature is sending up signals that this new Democrat circus **Does Not Pass the Smell Test.**

In fact, it reeks of espionage and/or Deep State Shenanigans.

Let's start with our favorite three letter word...WHY?

Why, all of a sudden, would the Democrats reveal that they have found classified documents in Biden's various locations?

Consider this:

- 1) It's a well-known fact they've manipulated the press to hide the Hunter Laptop AND these documents **all before the elections.**
- 2) They **stormed Trump's house** as they have NEVER done in the history of this nation regardless of how heated the politics have been.
- 3) It is even debatable if that would hold up at the Supreme Court level...but there is something far more sinister behind the curtain.
- 4) By revealing that Biden had classified documents – and now the Attorney General had to appoint a special prosecutor \* – there is no way they can

indict Trump on that theory without indicting Biden.

- 5) With the Republicans now in charge of the House, this is where the investigations start.

(\* Note: The Special Prosecutor (Robert Hur) is a friend of FBI chief Christopher Wray... Translation: Score one for the Deep State)

But we believe all of this seems to be more **misdirection**.

And as we wrote in our January 13<sup>th</sup> email:

**Or Maybe, JUST MAYBE** we're seeing the early stages of the Democrats strategy for the 2024 election called "*it's time to replace Joe before 2024.*"

Think about it.

They ALL know O'Biden's mental capabilities are failing.

And in order to pull off World War III, they may be using this ploy that compels him to resign...and at the same time tar & feather Trump for 2024.

More importantly, they need someone who is dumber than O'Brien – already in place – who will just read the prepared speeches on cue – i.e., Harris!

So, as far as **Political Chaos** is concerned, remember: we're still in the month of January.

And you can expect it to get worse.

But as far as the markets are concerned, we believe there could be some substantial surprises to the upside in 2023.

And we cover that in our opening article **FTX...The Tip of the Iceberg.**

And don't miss this month's Tin-Foil Times article titled *Hookers, Honey Traps, and History.*

As always, we love the fact that you are one of our valued subscribers.

And we also want to say that the battles we face in today's dark world are not about WW3, corrupt politicians, food shortages, Fake Pandemics, etc.

It's a battle of Good vs Evil.

But it's nothing you should fear.

Why?

*“For God hath not given us the spirit of fear; but of power, and of love, and of a sound mind.”*

~2 Timothy 1:7~

And it is our *hope* that what we publish will not only help you prosper AND thrive in Turbulent Times, but also see the world through a different set of eyes.

And as we are wont to say every week in our *Sunday Funnies*... As difficult as things might appear, Evil Always Overplays its Hand...And Righteousness Prevails.

*Thanks again for joining us on this Wacky Journey we're on.*

Kind regards,

**FTX... The Tip of the Iceberg**

Although much has been written about Sam Bankman-Fried and the entire **FTX scandal** we believe it's only the Tip of the Iceberg.

And that there's a lot more sinister activity that's not being investigated or reported.

In fact, **the FTX Scandal** is possibly one of the greatest distractions we've seen since the 2008 meltdown of the financial world.

Cue Up: The **Federal Deposit Insurance Corporation** (FDIC) meeting in November 2022 where they were discussing "**Bail-Ins**" that are likely to unfold.

FLASHBACK TO 2008 where the Boyz decided that they needed to **bailout** our banking system that had become *Too Big To Fail (TBTF)*.

In addition to putting the burden on taxpayers to pay for the bank's criminal mistakes \* the idea of **Bail-Ins** was created.

(\* Note: Not one banker was charged with criminal activity and/or violating banking laws from the 2008 Meltdown)

The effect of **Bail-Ins** was specifically intended to **protect the Banksters in the event of another financial meltdown...caused by their criminal activity.**

## **What is a Bail-In?**

A simple definition is that a bail-in is a relief or rescue strategy offered to a financial institution that is on the verge of collapse.

And this relief entails that creditors, **depositors** or bondholders of the company or financial institution **bear part of the company's burden.**

## **How a Bail-in Differs from a Bail-out**

Usually, in a bail-out, a financial institution is rescued by external parties such as the government.

But a bail-in requires that creditors and depositors of the financial institution to write off the debt the company owes them or they convert the debt owed to equity.

**Translation:** If you have money in a bank that gets “Bailed-In,” they’ll *steal your money first*.

And – like they did in Cyprus in 2013 – they’ll issue you shares in the “*new*” *bank holding company*...that will most likely end up worthless.

In case you missed it the FDIC is an independent agency of the US government that’s supposed to protect and reimburse your deposits up to a limit of \$250,000...in the event your FDIC bank fails.

And it was created during the Great Depression to restore confidence after over 9,000 banks failed.

But...and this is a Very VERY Big BUTT...

The situation today is far more complex.

Why?

In 2008, Goldman Sachs was gaming the system and created the mortgage-back crisis.

They talked/strong armed AIG into writing insurance for the bogus mortgage time-bombs \* so they could sell these products...***and then they traded against them.***

(\* See this month's Tin-Foil Times article "***Hookers, Honey Traps, and History***")

This is what led to the downfall of Lehman Brothers and Bear Stearns because the management looked at the insurance and NOT the underlying systemic risks.

It gets worse.

Today there is **shadow banking**.

And shadow banking came as a result of the Fed having to bail out AIG in London in 2008, which was underwriting insurance that they didn't understand.

As a result, this has led to the risk of **Bail-ins** whereby they (Institutions like **FTX**) took client money to cover institutional debt.

And in case you missed it, that's exactly what took place with **MF Global in 2011**.

Ironically (or NOT) – and similar to what Sam Bankman-Fried said about **FTX** – MF Global CEO Jon Corzine said he had: *“No idea where the money went.”*

Isn't it funny how these CEO's have "no idea where the money went?"

And isn't it funny how Corzine was a **former CEO of Goldman Sachs?**

However, Corzine was friends with Obama...so he was never prosecuted.

And it will be interesting to see who Sam Bankman-Fried's "close friends" are...and if he will escape prosecution like Jon Corzine.

**Why FTX is the Tip of the Iceberg**

The O'Biden Administration has no intention of protecting the rich.

Which is why the players involved with FTX are running around like the proverbial chicken with its head cut off.

And in a bank default, the maximum FDIC insurance will be **\$250,000 per person** *regardless of how many bank accounts you have with more than \$250,000...read the fine print.*

Today, the shadow banking issue is becoming the real crisis.

And the FTX collapse has opened Pandora's *not-so-transparent* box.

However, the real crisis centers around the fact that interest rates have been held artificially low (and even NEGATIVE in Europe) for the last 8+ years.

This alone has **undermined every portfolio** that owns government debt.

And as rates rise, the value of assets that banks hold in reserve – i.e., bonds – declines.

As a result, the greater rates rise, the greater the insolvency in most banks increases.

This also reduces the demand for long-term debt.

And this compels smart money to shorten its maturity on holdings.

## **What Should You Do About It?**

As we've been saying for over three years – and *if you are holding a lot of cash* – you may want to get some of your cash out of the banks.

Alternatives include Short Term T-Bills (30-90 days), gold and/or silver...something that's liquid.

And you may want to consider lightening up on any shares of a major bank (*Cough! JPM, Cough! BAC, WFC, C Cough! Cough!*) if you own them.

But that **does not mean** we think the market is going to collapse in 2023.

On the contrary, we could see a huge *sling-shot like effect* to the upside.

But we need to get past a few critical points we see developing by early February with perhaps a false low in January.

In the meantime, be sure to read this month's *Short and Sweet Tips* column.

And be sure to check back with us in February.

*In Case You Missed It* is a column where we showcase events/activities that take place every day but **often fly under the radar.**

Ironically (or NOT) we often hear from subscribers about how shocked they are to hear/see some of the events/memes we post.

However, that's probably because, our posts represent topics we don't always want to talk about or even believe.

And the **Political Chaos of 2023** is certainly no exception to the rule.

In fact, many of these memes are a harbinger for future events...**and we're still in the month of January.**

## **Conspiracy Theory or Conspiracy Fact?**

### ***All the News That's Unfit to Print***

This month's column is titled:

#### ***Hookers, Honey Traps, and History.***

It's a brief story about how corruption, greed, deceit and even espionage is interwoven in our system.

And with the exception of a major insurrection there's very little chance of change.

But as the **Political Chaos in 2023** gets underway we'd like to illustrate how this is nothing new.

*“**The thing** that hath been, it is that which shall be; and that which is done is that which shall be done: and **there is no new thing under the sun.**”*

~ Ecclesiastes 1:9 ~

And since we don't believe in coincidences, we're going to remind you that what we've been saying about conspiracy theories – for the last few years – have become facts.

**Not that we are keeping track or anything...**

**But conspiracy theorists are up 37-0**

The good news is how many people are realizing that many of our conspiracy theories are turning out to be conspiracy facts.

And as they become more obvious, they'll start to dig deeper in search of the truth.

***“And ye shall know the truth, and the truth shall make you free.”***

~ John 8:32 ~

**PEOPLE STARTING TO DISCOVER TRUTHS**

**"CONSPIRACY THEORISTS"**

So, let's get back to that *Hookers, Honey Trap* theme.

**Jeffrey** Epstein was clearly involved in one of the biggest honey traps probably in history.

But the *Boyz* have been using girls/women to blackmail powerful people for decades.

They even tried, but failed, with John F. Kennedy.

But they successfully got control of **J. Edgar Hoover**.

Read: Whitney Webb's [\*\*One Nation Under Blackmail\*\*](#).

This has been going on for a very long time.

Goldman Sachs was in a lawsuit for allegedly using prostitutes, fancy meals, and hotels to swindle the Libyan government in a [\\$1.2 billion lawsuit](#).

In NYC Lawyers routinely hire girls to sleep with the opposing counsel to get info.

And you might think this is limited to the private sector.

NOPE!

Sources have confirmed that the *Southern District of New York* pays for “paralegals” whose main role is to sleep with the prosecutors.

In turn, prosecutors have girls sleep with the defense counsel on legal spy missions.

## **New Breed of Super Spy**

Using seductive young women is a standard operational procedure in many fields.

Ironically (or NOT) [Israel's fearsome Secret Service](#) best agents are hot women rather than the James Bond type.

[Anna Chapman](#) was a Russian Spy caught in New York City.

She was swapped for American spies in 2010 and made headlines in New York. She was stunningly beautiful even in her mug-shot as well as stunningly successful.

I guess if you are going to betray secrets, this is far better than the rubber hose treatment.

Ironically (or NOT) Anna showed up in [Ukraine](#) to train with the soldiers leading the rebellion.

She has become known as Vladimir Putin's weapon of mass distraction.

Do you remember [Elliot Spitzer](#), Governor of NY?

He removed Hank Greenberg from AIG. \*

(\* Note: Greenberg **rejected** creating insurance on the mortgage pools at the request of Goldman Sachs...aka: *The Squid*.)

However, removing Greenberg made the whole Mortgage-Backed CDO Lending possible **and the collapse of the 2007-2009 crisis.**

It's believed that Spitzer *was fed information* – to remove Greenberg – by Goldman Sachs.

*The Squid* was then able to sell the idea of CDO Lending to AIG when Greenberg was removed.

The rest – as they say – was history.

And the world suffered a major economic collapse.

## **A Pawn Disguised as a Prosecutor**

Spitzer was just a pawn.

He thought he was really cleaning up Wall Street.

Then, when Spitzer turned on Wall Street, guess what?

**The Patriot Act** – ordering banks to report anything suspicious – turned up checks Spitzer wrote to a hooker.

So, the Terrorist laws were then used to get rid of Spitzer to save Wall Street Investment Bankers.

And do you remember the former head of the IMF who also stood in the way of the whole crisis, **Dominique Strauss-Kahn**?

He became a target when he was the IMF chief and began to comment critically on the role of the world financial system.

**Strauss-Kahn** was conveniently sent a [maid](#) to create a sex scandal to shut him up when he saw the corruption in the IMF.

They removed him under false accusations and cleared the way for the IMF to become a tool for the Boyz.

Ironically (or NOT) that is how the whole Long-Term Capital Management crisis developed because they bribed the IMF to keep the loans from going to Russia so they could buy their bonds by paying outrageous amounts of money.

### **The bottom line:**

Sex has always been a tool for getting into someone's corner or organization.

**Did You Know...** Trump's request for a wall to secure our border was a pittance compared to what we have given to Ukraine...so far?

The longest government shutdown in history occurred in 2018-2019 because Trump asked for \$5 billion to build the wall.

The \$45 billion Ukraine aid in the Omnibus will bring our total given to that country over \$100 billion, enough to build 20+ walls on the southern border.

Washington, DC is NOT part of America.

It's a completely independent city-state which is owned by globalist bankers, used for worldwide military power, and funded by American citizens.

Washington DC will never fix America's problems.

The Chinese government has rolled out "money with expiration dates" using its prototype Central Bank Digital Currency (CBDC) which means that citizens are forced to spend the money and are not allowed to save and build wealth.

***be sure to keep track of the "Use By" date on your paycheck or your money vaporizes.***

Instead of chasing child sex predators or terrorists, the FBI has agents — lots of them — analyzing and mass-flagging social media posts. Not as part of any criminal investigation, but as a permanent, end-in-itself surveillance operation. People should not be okay with this.

## ***Short and Sweet Tips for January 2023***

*“The markets move in the direction that frustrates the  
most investors.”*

As the **Political Chaos of 2023** is just getting started,  
we’re confident you will see opportunities of a lifetime in  
the next several months.

But the \$64 Billion question remains: *Are you ready to  
take advantage of them?*

And that's one of the reasons why we publish our monthly *Short and Sweet Tips*.

So, instead of getting caught up in fear of frustration over the markets – and/or thinking “*I shoulda, coulda, woulda*” – we also want to remind you:

*There are those that buy at the bottom, and there are those that sell at the top, but, they're never the same person.*

~Jesse Livermore~

Legendary Trader (1877-1940)

If you're reading this, chances are you'll hit some home runs along the way because you recognize that we're still in **The Most Hated Bull Market in History**.

As a result, you won't end up like many of your friends or acquaintances who regret their decisions.

So, to start off this month's *TIPS*, we're listing 5 stocks that we believe **have reached their peak in price**. \*

(\* Please note: We're not telling you to sell them. And before you take action you should check with your advisor.)

In no particular order they are:

- 1) Aflac (**AFL**)
- 2) Smucker Company (**SJM**)
- 3) Walmart (**WMT**)
- 4) Becton Dixon (**BDX**)
- 5) CMS Energy (**CMS**)

We realize most of the above stocks are boring but they've performed very well...especially in a crazy year like 2022 where massive losses occurred.

And, as usual, many of you want to see us recommend the home run stocks that make lots of money quickly.

Unfortunately, *they can also lose a lot of money quickly.*

But just to keep you happy we're going to offer up two stocks to consider that might shoot to the moon in 2023.

And it will be based on the fact that most of Europe is freezing to death this year and how they've reconsidered their ban on coal and nuclear power plants.

This will be a boost for ***oil and Uranium stocks***.

And while Uranium should not be correlated with oil, we suspect that as oil recovers, ESG-focused investors will rediscover Uranium as a substitute.

And should Uranium become oddly correlated with oil in 2023, we present to you two companies to consider:

- 1) Cameco Corp (**CCJ**)
- 2) Uranium Energy Corp (**UEC**)

Why these two?

Cameco (CCJ) is the largest Uranium producer in the country and can certainly benefit from a resurgence of nuclear power.

Uranium Energy Corp (UEC) is a small cap stock trading under \$4.00 per share (as of this writing) with a lot of reserves available that haven't been mined...yet.

And for some reason most investors think that buying a low-priced stock will give them a better return than a high-priced stock.

But that remains to be seen.

Again, we remind you that this is not a recommendation to buy or sell any stocks or securities.

We're suggesting these stocks not just based on why we like them, but it's because our readers want something besides boring brand name stocks that pay dividends.

Be sure to check back with us next month where we'll cover the big boring ones in more detail.

**In the meantime, thanks again for joining us on this Wacky Journey we're on.**

**See You Next Month...**
